An overview of the art of desalination at scale. Desalination plays a major role in a wide range of applications from water reuse to drinking water production. However, at the high volumes and large-scale levels of production necessary for most applications, desalination is in many cases realized today through the use of reverse osmosis. The progress of desalination over the last three decades has been considerable. At the same time, however, challenges remain. Both economic and practical concerns need to be addressed. This review summarizes the state-of-the-art of desalination and provides insight into future trends and their implications.

then equipped and outfitted with the necessary equipment to exercise constitutional rights that were in the process of being abridged as their homes were being entered by the police. The confusion that existed during the execution of the restraining order and the resulting almost mass influx of law enforcement officers at the Lakewood women's bathroom was the result of over zealous police officers being too eager to escalate a minor traffic incident into an alarming, yet completely unfounded, criminal case. They charged the individuals involved in the incident with loitering, thereby putting them in trouble with the law. The incident was a complete waste of time and a complete waste of public resources on the part of the police officers involved. To my knowledge, no evidence was ever presented that any of the participants in the incident was loitering or was even aware that the police were serving a restraining order at the time of the incident. Furthermore, a governmental document reviewed by this site demonstrates the police decided to intercept the women's restroom en route to a grocery store parking lot where they were intending to make a report to a law enforcement agency. Based on this fact alone, it is highly unlikely that the individuals involved in the incident were given an opportunity to willfully, knowingly, or even negligently stop engaging in lewd and lascivious conduct. There are, of course, valid cases where people are legitimately under the influence of drugs and end up being arrested for an incident that they did not plan. They are, however, the exception.
