
PacMan World 3 Torrent

Pac-Man World 3 is the third installment in the Pac-Man World series. It has improved graphics and more dot chewing action than the last two games. The game has four characters that can be selected at the beginning. The player must control each of them. Each character has three different location maps (patient, labyrinth and world). The player must go through all four locations while avoiding opponents such as a cannonball that can crush Pac-Man. The cannonball and other enemies can be destroyed with rockets that appear in the maze. Pac-Man World 3 was developed by Namco and released in Japan in July 1998.
